

C34 Community action on flooding

Theme(s):	A: Conserve and restore river habitat, and adapt to / mitigate for the physical impacts of weather extremes and climate change. B: Improve people's understanding of rivers, catchments, weather extremes and climate change. Increase community participation
Goal(s):	A3: Reduce risk from or control flooding. B1: Increase awareness of the impacts and risks of weather extremes and climate change.
Sub-goal(s):	A3a: Reduce risk from or control flooding from rivers. A3b: Reduce risk from or control surface water (runoff) floods.

Taking a partnership approach by engaging with communities that flood to resolve issues where possible, produce community flood plans and generally build community understanding of, and resilience to, flooding.

Project Status:	Current
Deliverer(s):	Northumberland Community Flood Partnership
Funding source(s):	Environment Agency, Northumberland County Council
Timeframe:	Currently funded to March 2013
