

## C39 Salmonid and diatom research

Theme(s):	B: Improve people's understanding of rivers, catchments, weather extremes and climate change. Increase community participation in monitoring change and taking action to improve and protect water environments.
Goal(s):	B5: Carry out research and monitoring, and collect and make available relevant data.
Sub-goal(s):	B5a: Better understand complex or poorly-understood issues.

Research into the effects of contaminants on fish and diatoms and better understanding of diatoms in sediments.

Project Status: Current  
Deliverer(s): Newcastle University
